Assignment 0204 Feedback

Outcomes that eventually cover both 2D and 3D max out at | for now because we are dealing only with 2D in this assignment. They will expand to their full potential with the 3D course work.

Misa Pham

misapham / misapham

*Notes while running (high-priority notes are marked with ***):*

- Fun idea! Definitely a cohesive suite of sprites :) (+1a, +3a)
- Transforms don't seem to be quite lined up right yet in this version (I'm looking at something shortly after the due date, not your latest version), but otherwise no runtime issues or problems seen. (2a)

Code review (refer to <http://lmucs.github.io/hacking-guidelines/> for code-review abbreviations):

1. <http://lmucs.github.io/hacking-guidelines/all/#all-spc> (4c)
2. For the Ben sprite, you might want to consider making the `headTilt` property a number too (if you haven't already)—after all, the tilt of the head *can* take intermediate values. (3a, 4a)
3. Looks like the Jojo and Olivia sprites can still use some transformation adjustments, but I will guess that you already knew that and may have fixed it by now. (2a, 4a)
4. <http://lmucs.github.io/hacking-guidelines/javascript/#js-eq> (4b) —This can be seen in *bachelorBen.js* and *olivia.js*.
5. You do a good, thorough job with naming your various constants so that their meaning and intent are explicit—that is good to see! (+4b, +4c)
6. Corollary of <http://lmucs.github.io/hacking-guidelines/javascript/#js-func> (with respect to spacing)—sometimes you do, sometimes you don't. Be consistent, ideally according to the guideline. (4c)

1a — +

2a (max |) — / ...These are the still-disjointed heads/arms/torsos (as of the version I reviewed).

3a (max |) — |

4a — | ...Transforms loom here, and also the unnecessarily-a-string `headTilt` property.

4b — +

4c — / ...The tabs alone are already a drag—this should be taken care of by your editor by now!

4d — +

4e — | ...Descriptive messages and good frequency; timing can be a little bit better by starting sooner than February, four days before it's due :)

4f — + ...Submitted on time.
